## ASSOCIATE OF APPLIED SCIENCE DEGREE (AAS)

This program provides students with the skills to plan, prepare and interpret construction documents. Students will develop these skills through board drafting with a high emphasis on using computer-aided design and drafting workstations. Instruction also includes office standards, ethics, equipment maintenance and production techniques. This degree is used as the basis for students entering civil engineering design, architectural design, electrical engineering design or mechanical design fields as well as for employment as CADD operators.

## STUDENT LEARNING OUTCOMES - Graduates of this program will have the opportunity to:

- Perform tasks in operating a CADD workstation using industry standard software used in Southern Nevada.
- Produce two- and three-dimensional construction documents using the drafting tools within the CAD software that will apply to their discipline.

Students may elect to graduate using the degree requirements in effect at the time of matriculation, or when they declared or changed major or the current catalog. If a program is official after a student has matriculated, the student may choose the degree requirements of the new program. In no case may a student use a catalog which is more than six years old at the time of graduation.
